

JAVA FUNDAMENTALS - NOTES + INTERVIEW Q&A;

What is Java? Java is a high-level, object-oriented programming language.

Class: Blueprint of an object. Everything in Java is inside a class.

Keywords: Reserved words like class, public, static.

Identifiers: Names for variables, methods, classes.

Rules:

1. Class name must match file name (if public).
2. Cannot use keywords as identifiers.
3. Identifier cannot start with number.
4. Only one public class per file.

print vs println:

print() -> same line

println() -> new line

printf() -> formatted output

Main Method: Entry point of Java program.

```
public static void main(String[] args)
```

Execution Flow: .java -> javac -> .class -> JVM -> Output

INTERVIEW QUESTIONS & ANSWERS

Q1: What is a class?

A class is a blueprint used to create objects.

Q2: What are keywords?

Keywords are reserved words in Java.

Q3: What are identifiers?

Identifiers are names given to variables, methods, and classes.

Q4: Can Java run without main method?

It compiles but does not run.

Q5: How many public classes in one file?

Only one public class is allowed.

Q6: Difference between print and println?

print() prints on same line, println() moves to next line.
